Technical Skills

Languages : Python, R, SQL, Java, C#, C, JavaScript/TypeScript, HTML/CSS

Data Automation : Power Automate, Tableau, Informer 5, MATLAB, Forensic Toolkit (FTK)

Databases : MongoDB, PostgreSQL, MySQL

Software & Media : Adobe Creative Cloud, Microsoft Office, Google Workspace

Experience

Data Engineering Intern May 2026 – Aug 2026
Delaware Valley University *Remote – Doylestown, Pennsylvania, USA*

- Developed an automated **Excel-based** scheduling program in **TypeScript** that analyzes course information to generate optimized final exam schedules while minimizing student and faculty conflicts
- Analyzed student enrollment, course requirements, placement data, and historical trends from **Informer 5** reports to support data-driven student success initiatives, reducing manual analysis and supporting more efficient academic planning
- Participated in Institutional Research department meetings, contributing technical and analytical input to discussions surrounding student data and process improvement
- Engaged in AI-focused training sessions on **BoodleBox**, an institutionally approved AI platform, exploring responsible applications of AI for administrative and data-analysis workflows

Data Analyst Intern Sept 2025 – Nov 2025
Ivy Capital Partners *Dublin, Leinster, Ireland*

- Designed and implemented an end-to-end automation workflow utilizing **Power Automate** and **JSON** to extract objectives from meeting summaries and trigger personalized client deliverables
- Managed data quality and volume constraints within a live business environment, ensuring high-accuracy automation for client-facing engagement pipelines
- Spearheaded SEO and technical accessibility optimizations, resulting in a 33% increase in site traffic and improved user session by 12%
- Co-led introductory and follow-up calls with prospective international clients; successfully transitioned early-stage conversations to strategic reviews with senior partners

IT Manager | **Chief of Staff** | **Technology Editor** Aug 2021 – Current
Reporter Magazine *Rochester, New York, USA*

- Promoted through multiple levels of responsibility, starting as a freelance writer and advancing to senior leadership based on organizational impact and technical expertise
- Manage the magazine's digital road-map and backend systems, driving a 120% increase in user engagement through optimized site performance and database management
- As Chief of Staff, stabilized personnel logistics and streamlined inter-departmental operations during a critical transition period
- Lead ongoing site-wide accessibility and SEO audits to ensure compliance with standards; coordinate technical displays for the Imagine RIT exhibition

Education

Combined Collegiate GPA: 3.1

Rochester Institute of Technology Rochester, New York, USA
Bachelor of Science in Computer Science & Computational Math Minor in Chinese Language *Aug 2022 – May 2027*

Delaware Valley University Doylestown, Pennsylvania, USA
Concurrent/Accelerated College Enrollment *Dec 2019 – Aug 2025*

Projects & Research

ASA Datafest 2025 *Python, R, Excel* Award: 3rd Place, Best Insights

- Analyzed a massive, unstructured dataset over 48 hours to identify actionable trends for a national non-profit.
- Developed a data-cleaning pipeline using **R/Python** to visualize key correlations overlooked by other teams.
- Awarded 3rd Place for "Best Insights" out of dozens of competing teams

Music Retrieval System *Python* Source Code

- Engineered an information retrieval system for MIDI files, generating a method for searching and classifying musical structures using **TF-IDF** methods
- Authored a technical paper submitted for consideration to the *Mathematics and Computation in Music* conference

LinkedIn Network Visualization *Python* Source Code

- Mapped professional networks using **Natural Language Processing** and **TF-IDF** models to identify expertise clusters based on networked profiles
- Leveraged **Python** Libraries to transform raw export data into an interactive network graph

Professional Development & Specialized Coursework

Data Analytics Track Summer 2025
Global Career Accelerator

- Utilized **Python** and **Excel** to analyze audience behavior and KPIs for Grammy/Recording Academy web pages
- Developed interactive dashboards and visualizations in **Tableau**

Coding for Data Track Summer 2024
Global Career Accelerator

- Co-designed a data-driven proposal for data center placement based on Northwest regional renewable energy consumption trends
- Wrote **SQL** queries and Python-based extraction/manipulation of real-world datasets

Quantum Computing 2021 - 2022
IBM Quantum / Qubit by Qubit

- Completed 8 months of live lectures and labs covering linear algebra, probability, and physics properties of quantum mechanics
- Engineered quantum gates and circuits; implemented algorithms and executed code on a live IBM quantum computer

GenCyber Advanced Cyber Forensics 2021
Norwich University

- Analyzed digital evidence with tools used by global law enforcement, including **Forensic Toolkit (FTK)**
- Conducted mobile phone forensics and digital evidence analysis in a high-intensity lab environment
