Objective

Fourth-year Mathematics & Computer Science undergraduate student with work experience in data analytics and IT; seeking full-time positions or internships in data science-related fields, available starting December 2026.

Education

Combined Collegiate GPA: 3.26

Rochester Institute of Technology Aug 2022 – May 2027
Bachelor of Science in Computer Science & Computational Math, Minor in Chinese Language *Rochester, NY*

Delaware Valley University Dec 2019 – Aug 2025
Concurrent/Accelerated College Enrollment *Doylestown, PA*

Experience

Data Engineering Intern May 2026 – Aug 2026
Delaware Valley University *Doylestown, PA*

- Built an automated course-availability **Excel-based** program that compared incoming students' placement data against course and program sequences to support student success and enrollment planning
- Developed a **TypeScript** scheduling program using **Informer 5** data to generate optimized final exam schedules, minimizing student and faculty conflicts
- Collaborated in weekly Registrar and Institutional Research meetings, translating institutional data needs and limitations into practical and data-driven solutions

Data Analyst Intern Sept 2025 – Nov 2025
Ivy Capital Partners *Dublin, Ireland*

- Designed and implemented an end-to-end Microsoft-integrated workflow in **JSON** to extract objectives from meeting summaries and trigger personalized client deliverables, enhancing direct client engagement
- Managed data quality and volume constraints within a live business environment, maintaining high-accuracy automation for client communication; adapting technical communication for varied audiences
- Improved website accessibility by 25% (SiteImprove) with keyboard navigation, screen-reader compatibility, and higher contrast, and raised the **Google SEO** score by 20+ points; monthly site traffic rose 33% during the internship

IT Manager & System Admin Aug 2021 – Current
Reporter Magazine *Rochester, NY*

- Track and report on site performance using Google Analytics, growing traffic 120%+, raising user stickiness (monthly users) by 25%
- Lead weekly meetings with members and university staff as an Eboard member, including website demos, new-feature presentations, and implementing feedback
- Advanced ongoing site-wide accessibility and SEO audits to ensure compliance with standards

Projects & Research

ASA Datafest 2025 *Python, R, Excel* Award: 3rd Place, Best Insights

- Analyzed a massive, unstructured dataset over 48 hours to identify actionable trends for a national non-profit.
- Developed a data-cleaning pipeline using **R/Python** to visualize key correlations overlooked by other teams.
- Awarded 3rd Place for "Best Insights" out of dozens of competing teams

Music Retrieval System *Python*

- Engineered an information retrieval system for MIDI files, generating a method for searching and classifying musical structures using **TF-IDF** methods
- Authored a technical paper submitted for consideration to the *Mathematics and Computation in Music* conference

LinkedIn Network Visual *Python*

- Mapped professional networks using **Natural Language Processing** and **TF-IDF** models to identify expertise clusters based on networked profiles
- Leveraged **Python** Libraries to transform raw export data into an interactive network graph

Technical Skills

Languages	Python, R, SQL, Java, C#/C, JavaScript/TypeScript, HTML/CSS, MATLAB
Data Automation	Power Automate, Tableau, Informer 5, Forensic Toolkit (FTK)
Databases	MySQL, MongoDB, PostgreSQL
